

PG LIFE LINK'S MARK V LINE ISOLATION MONITOR – Innovative IPS Technology

September 26, 2008

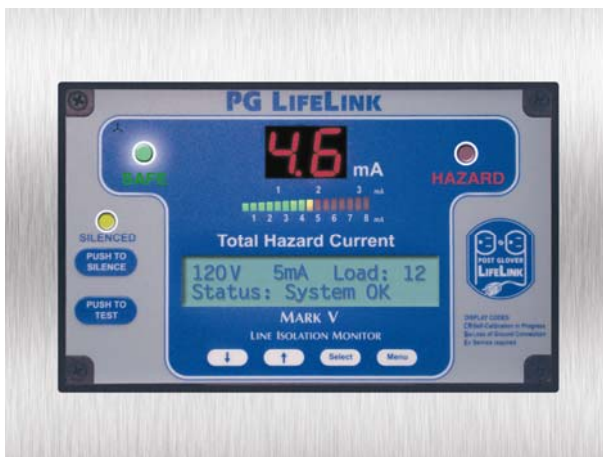

THE MARK V LINE ISOLATION MONITOR <http://www.pglifelink.com/line-mark5.htm> by **PG LIFE LINK** represents a step forward in isolated power monitoring systems. The **MARK V** is the **ONLY** Line Isolation Monitor available with a sophisticated on-board status display and an easy to use PC interface. This device was designed with the user in mind. Enhanced features and improved functionality make this the most flexible LIM on the market today.

The prominent LCD instantly communicates important information such as line voltage, THC range (2 or 5 mA) and system status indication. A simple menu driven user interface allows access to settings such as time/date, volume and test intervals. Users may also scroll through recent Alarm and Event logs using the convenient front mounted keys.

Optional **PG LIFE LINK LIM-CONNECT™ SOFTWARE** and Ethernet interface allows remote monitoring and operation via standard PC, as well as downloading of stored data to applications such as *Excel*. No proprietary handheld device necessary.

User can select self-test interval to fit facility constraints. Operating voltage range is user selectable for 120 or 208/240VAC isolated systems. Line frequency is automatically determined. Actual line-to-line voltage of the Isolated Power System is monitored and conveniently displayed on the LCD.

Optional transformer load and temperature monitoring feature available.
