

LabLink Family of Laboratory Products Expands – PG LifeLink introduces the LED LabLight

The **LabLink** LabLight is a streamline LED solution for laboratory workbenches. The high power, white LED light source directs up to 95% of illumination to the work surface. The LED output is 25% higher than existing 2-tube fluorescent fixtures.

PG LifeLink's LabLight is made from 95% recycled materials and Energy Star rated components. The specially designed polycarbonate lens provides maximum light dispersion for uniform task lighting. The aluminum housing efficiently manages the heat of the LEDs and helps extend the lamp's lifespan and lower its operating cost. The 50,000 hour LED service life makes the LabLight virtually maintenance free.

The LabLight is easily attached to metal, plastic or wood furniture by several connection choices including magnet, brackets or directly to the bench. We offer a selection of sizes that will accommodate any bench length.
