PG LifeLink

Innovation In Power Safety

PG LifeLink (PGL) is a complete source for Isolated Power Systems, Accessories and patient care equipment. Through continual product development, **PGL** offers dozens of application choices. **PGL** has been involved with Isolated Power System design since 1957. Meeting the ever-changing needs of the healthcare industry, **PGL** is truly the leader in innovation and design.

***PG LifeLink** expands business offerings to include educational product training and electrical code awareness.*

Recent product innovations include the introduction of the **Mark V** Line Isolation Monitor and the development of **LIM-Connect™** software. This software allows facilities to manage all of their operating rooms from any computer on their network with real-time data logging and alarm. **PGL** has proven their continued dedication to research and development, offering their customers the best product on the market today.

With the growing need for X-ray, laser and a multitude of electrical devices, the **Dual Voltage**, **Duplex** and **X-trol** panels solve many difficult situations in today's operating room environment. **PGL** has the technical capability to help you determine your specific power needs.

PG LifeLink works with facility managers, design engineers, architects, contractors and hospital administrators who are designing isolated power systems, providing custom configurations to fit specific situations. **PGL's** in-house sheet metal capabilities enable them to respond to even small detailed specifications. Their products are certified and manufactured to ISO9001-2000, UL and CSA standards.

Lunch-and-Learn programs regarding the use of isolated power, maintenance and code changes are offered by **PG LifeLink**'s technical experts, along with LabLink laboratory connection product programs. Large groups can be trained in their facility or hosted offsite.

PGL now offers installation, certification, repair and maintenance programs for your isolated power systems. "It's our goal to work with you every step of the way", says Judy Kathman, President of **PG LifeLink**. "We've added additional services to our business offerings, allowing us to close the loop for our customers."
