

PG LabLink Connection Products = Cost & Labor Savings

PG LifeLink designs and manufactures **Versa-Duct Raceway** and **LabLink** connection products for the healthcare, laboratory and research industries.

LabLink product designs include options for multiple power, gas and data connections. The pre-wired products reduce cost of installation and have the ability to be reconfigured in the field should a change in room design or functionality be necessary.

LabLink products include:

- Power, Gas & Communication Pedestals
- Power Strips (horizontal & vertical -- power, gas & data)
- Power Poles (floor to ceiling & counter to ceiling)
- Ceiling Connection Plates (umbilical applications)
- Aluminum Surface-Metal Raceways (Versa-Duct)

LabLink products arrive ready for installation. No pre-assembly required. Wire, cable and plumbing connections are made directly to the **LabLink** product, reducing installation time and money.

Contact **PG LifeLink** at **800-287-4123** to discuss your specific needs or visit their website at www.pglifelink.com.
